Statement of Proprietary Rights and Exclusivity of STKO Software

Date: 23/10/2023

To: Dr. Shivang Shekhar, Indian Institute Of Technology Mandi (IIT Mandi), India

This is to certify that ASDEA Software S.R.L. is the sole producer and owner of the software STKO Scientific Toolkit for OpenSees, a graphic user interface for OpenSees. No other company on a national or global level produces STKO. Our licensing and technical support is provided from our head offices in Pescara, Italy. We further confirm that our company does not have official representation in India, and thus we are the only legal distributor of the software in India.

STKO is a Graphic User Interface (GUI) for OpenSees. STKO is the only pre and postprocessor that includes ALL materials, elements, conditions, and interactions offered in OpenSees. Similar products contain subsets of what is available in OpenSees, usually tailored to specific research areas. Instead, STKO includes everything available in OpenSees, making it a suitable tool for creating visual models of any analysis to be run in OpenSees. Our team also directly collaborates with the OpenSees creators and researchers worldwide to develop new capacities for OpenSees and STKO to stay up-to-date with the latest advances in the field. The software uses both an HDF5 database and a Python scripting interface, making it both more powerful and more customizable than other similar tools.

It should be noted that the STKO (Scientific Toolkit for OpenSees) software does not include OpenSees, which can be downloaded for free.
